

# DUAL ACTION™

## Multi-Purpose Sockets

# DUAL ACTION™

The best action you can take.

Dual Action sockets are truly multi-purpose - designed for the strength an impact tool demands, engineered with thin walls for the precision a hand tool provides.

**LIFETIME  
WARRANTY**

**IMPACT + HAND  
TOOL RATED**

[DualAction.com.au](http://DualAction.com.au)

## Professional Dual Purpose Sockets

Specifically engineered for the needs of the professional technician, Dual Action™ sockets and accessories provide unparalleled versatility by allowing easy switching between the precision and access of a hand tool with the power of air and cordless impact tools.

Wobble extensions provide 15° of deflection and can also be locked straight for normal use.

Recessed quick release button prevents accidental release of the socket.

Low profile ratchet design allows greater access to confined areas and will not catch on items in the work

The thin wall design of chrome hand sockets combined with the strength of Impact Sockets creates the Professional Dual Action™ Socket Series. With a Dual Action™ you really are ready for action.

SAVE YOURSELF TIME, MONEY AND VALUABLE SPACE IN YOUR GARAGE.

# ACTION

## Action: Tools For Professionals

Action Impact Sockets are specifically engineered for professional use with impact tools.

Action employs the best design, material, processes and quality control in the industry.

## Action: Best Material, Superior Process

Action Impact Sockets are made of the best material (chrome-molybdenum alloy steel) to meet the extreme requirements that professional users require from their tools. Action uses a drop forge process to form our Impact Sockets followed by precise heat and surface hardening treatments to deliver unsurpassed material strength, hardness and superior surface durability.

## Action: World Class Quality

Action Impact Sockets are World Class products which meet Federal Specifications GGG-W-660A and DIN 3121 & 3129. Our independent quality control program uses the latest technology and statistical tools to assure that each Action Socket matches World Class standards; hardness, function and torque are all spot tested. Action Impact Sockets are all warranted against defects in materials and workmanship for the life of the product.

## Action: We Have The Tools You Need

Action Impact Sockets are available in every popular drive, size and configuration including:

1/4", 3/8", 1/2", 1", 1-1/2", and 2-1/2" drives, #5 Spine drive as well as all popular sizes in SAE, Metric and Star Sockets for Torx nuts, Action also has long experience in producing special size tools based on customer specifications, samples or drawings. If the tool you needed is not in this catalog, we can make it special for you with the same quality and attention to detail that you get from all Action products.

The Specifications in this catalog are given as general information and are not binding. Due to a policy of continuous improvement, ACTION TOOLS reserves the right to modify specifications without prior notice.

# Safety Rules

THIS SYMBOL INDICATES A  
HAZARD ALERT WARNING

MANDATORY EYE  
PROTECTION

## *Important Words About Safety for Users and Bystanders*

These safety recommendations simply reflect good engineering practice and are not intended to be a comprehensive set of rules. They compliment, but do not replace standard precautions to be taken by every user in compliance with professional guidelines, company procedures or national regulations. Keep and follow all power tool manufacturers operating instructions and safety rules. Remember, all the rules in the world cannot replace good common sense.

- Always wear eye, face, hand and body protective equipment while using or near the use of any Impact Tool or Attachment.
- Use only Impact Sockets or Chisels that are in good condition. Worn Tools reduce impact power and could also shatter, resulting in personal injury.
- Always select the correct size and type of Tool for the job to be done.
- When using a Universal Joint, Adapter or Extension Bar, never operate the Tool off the work.
- Use only Socket Retaining Pins designed for that purpose. Never use a make-shift pin.
- Never continue to hammer with an Impact Socket once the Fastener is tight.
- Always use the simplest hook-up possible. Long Extension Bars and Adapters absorb impact power and could break loose, resulting in personal injury.
- Never modify an Impact Socket from its original design to accomplish a task for which it was not intended.
- Never strike an Impact Socket or Chisel with a Hammer or other hard object.
- Never hold a Socket, Chisel, Universal Joint or other Attachment in your hand while the Power Tool is running.
- Keep tools away from Children.
